

Label-Aire Introduces an Economical Wipe-On Applicator

Label-Aire has announced the release of the new Model 2015 economical pressure-sensitive, stepper driven wipe-on labeler. The 2015 boasts web speeds of 750 linear inches per minute with a standard label width of 4" and an optional label width available at 6". This stepper driven labeler has an exceptional placement accuracy of up to $\pm 1/32$ ".

The 2015 is available in right hand or left hand models and can label products in any attitude (top, side or bottom) when used in conjunction with available product handling systems. It will accept a wide variety of label sizes without the need for change parts and features plug and apply capability for adding optional features. No need to hard wire components.

With built-in trouble shooting compatibility, the 2015 has LED indicators to monitor functions and diagnose fault conditions. Retrievable potentiometer settings for label sensor, label stop, and web speed make adjustments simple. Settings are digital to prevent fluctuation during line voltage changes. In addition, the 2015's rugged corrosion resistant, anodized aluminum housing enhances durability and maintenance free operation.

Since 1961, Label-Aire has earned a reputation for engineering and manufacturing leadership. For more information on the 2015, please contact our Sales Department.
